

Census Filters

Last Modified on 03/15/2023 4:29 pm CDT

Census filters provide the ability to narrow down the census to more relevant patients.

- To manage filters, select the funnel icon in the bottom right corner of the census

Filters

- Locations: specify which location's patients should appear on the census
- Assigned To: filter based on provider assignment; assigned to *Me* (your patients), assigned to *Anyone*, *Unassigned*, or *Disregard*. We recommend leaving this set to *Disregard* for the most comprehensive census

Sorting

- Group By: specify how patients are grouped on the census. Options include: *Admit Date*, *Last Consult Time*, *Location*, *Name*, *Payor*, *Room/Bed*, and *Unit*
- Order Direction: order census patients based on the *Group By* value: Ascending or Descending

Patient Display Example

- A preview of how patient information will appear on the census based on *Patient Display Settings*

Patient Display Settings

- Name Display: *Last Name*, *First Name -or- First Name, Last Name*
- Room/Account/MRN/Location: In addition to patient name, date of birth, and admit date, choose which value should be shown on the census

Edit **Census** +

Q Enter first and/or last name

All changes synced

Viewing 4 patients at 3 locations today.
