Release Notes

Last Modified on 08/15/2024 2:33 pm CDT

General maintenance is every Wednesday evening, unless canceled. There will be no interruption in service during maintenance. Any disruption of service will be communicated in advance.

Q3 2023

What's New

- Default Holidays have been updated in Clinic Schedules to reflect accurate holidays for 2023
- A column for Provider Role has been added to the Batch Report
- Updated 2023 CPT RVU Data: updates have been made to CPT RVU data for accurate and up-to-date reporting.
- Updated Filtering options in the Urgent Message Report for increased flexibility

Q4 2023

What's New

- Updates to Mobile ICD10 assets to ensure compliance and accuracy
- Update ICD Search to CMS
  - Full migration to CMS for ICD search functionality to eliminate duplicate ICD search results on both web and mobile

Bug Fixes

- Update to allow leap day DOB during leap years.
- ICD Nickname Save - back button and "done" button save an ICD nickname

Q1 2024

What's New

- Improved ICD search functionality to include acronyms for more comprehensive code lookup
- Facesheet has been enhanced to display any previous names associated with the patient for improved record accuracy and completeness

Q2 2024

What's New

- Password reset links will now expire after 72 hours for increased security
- Resolved a scrolling issue in urgent message notifications box.
- Added a feature to the Biller Productivity report to show results by charge or by patient to help identify how many distinct patients a biller has worked on in a given time span.
